## Instructions:

Trim, score, and fold cardbase out of lavender cardstock. Stamp “elaborate” background with distress ink on cardfront. Trim a white panel slightly smaller than card front, and stamp heart wreath in embossing ink offset to one side. Before embossing, stamp sentiment over top with black pigment ink – then all at once sprinkle clear embossing powder over all. Set with heat gun, let cool, then blend distress ink over top to make wreath pop from background. Add some water splatters and allow to dry. Dampen gold watercolor with a wet brush, and add some flicks over front and again allow to dry. Finish by adding a thin strip of black cardstock to one side, then adhere to card base with elaborate pattern showing on one side.
